
Maximo Solutions Architect

- MACS EU LTD

Customer	:	TBC
Requestor	:	Alex Brain
Date	:	10/07/18
Document	:	Maximo Solutions Architect
Version	:	0.02

MACS EU is an international, Gold Accredited business partner of IBM with operations in the Netherlands, the UK, Germany, and Belgium. Our focus is selling and implementing IBM software products; namely Maximo and TRIRIGA.

Position Description:

Solution Architect role within the organisation, focused on providing functional expertise in Work and Asset Management (WAM) and Operational Device Management (ODM) implementations on Maximo product engagements. Multi-product implementation experience is a plus. This resource will work directly with client's core business team to ensure focus on business case objectives, leveraging best practice processes across the solution set, and scope management. This role also involves developing practical and creative solutions in a way that solves business problems through facilitation of workshops with clients to deliver a clear specification of the customer's business requirements and a business-justified solution

Responsibilities include, but are not limited to:

Internal

- Inspire and mentor our consultants, with a focus on building expertise our clients value, external brand eminence and accelerating career advancement of strong performers
- Contribute to reusable collateral/accelerators
- Knowledge sharing across peer group

Project engagements

- Apply professional mastery and industry-wide understanding of technology, tools and methodologies to develop solutions in leading edge or critical situations.
- Guide clients towards solutions that leverage base system functionality and best practices in the industry.
- Guide and facilitate system configuration.
- Anticipate future customer, industry and information technology trends.
- Ability to review and understand multiple designs and ensure formation of a creative and cohesive solution.
- Collaborate with sales and delivery teams from initial sales discovery through design and implementation of the Maximo solution
- Translate business and technical requirements into a project and architectural blueprint that achieves the desired business outcomes, including identifying solutions
- Assist in the creation of the delivery roadmap, estimates and project timelines
- Help define scope of the project via a broader solution and visioning conversations
- Lead projects in a highly collaborative model with other consultants and clients
- Use consulting skills, business knowledge and package solution expertise to effectively implement package technology in a client business environment to achieve client expected business results.
- Lead working sessions to understand client business requirements
- Work closely with client stakeholders to define and document client specific business cases, business needs and requirements
- Develop and deliver project deliverables such as roadmap, process diagrams, use cases, gap analysis and functional design documents
